10 months

## ***Younglove's Services***

- Conceptual design
- Structural engineering
- General construction
- Construction management
- Slipform concrete construction
- Equipment installation

## ***Creston, Iowa***

This facility is an 800-ton-per-day soybean processing facility built for CF Processing, L.L.C. (a division of Crestland Cooperative), in south central Iowa. The facility includes the site development, transfer from existing storage, preparation building, extraction building, oil storage, meal/hull finishing, meal/hull storage, loadout, and support facilities.

Construction began in February of 1998, and start-up was in December of 1998.

Younglove designed and built this project, working very closely with Younglove's major equipment supplier, Crown Iron Works Company of Minneapolis, Minnesota.
