Archer-Daniels-Midland

Size/Capacity

195,000 cubic feet fly ash storage
220,000 cubic feet limestone storage

Completion Time

12 weeks

Younglove's Services

- General construction
- Slipform concrete construction

Decatur, Illinois

ADM called on Younglove to provide construction services for four material storage silos for their new cogeneration plant. This facility consists of two 38-foot-diameter by 144-foot-high fly ash silos and two 38-foot-diameter by 130-foot-high limestone silos.

Upon receiving the contract, Younglove personnel mobilized immediately to attack the aggressive schedule set by the owner. In 12 short weeks, Younglove had the project completed and ready for the owner to begin installing equipment.
