

ADM FLOUR MILL AND GRAIN STORAGE

Owner

ADM Milling

Size/Capacity

Three 10,000 cwt mills
Twenty 35' dia. x 140'
tall wheat storage silos

Completion Time

22 months
Completed 08/2019

Younglove's Services

- Conceptual design
- Structural engineering
- General construction
- Construction management
- Slipform concrete construction
- Equipment installation
- Start-up and commissioning

Mendota, Illinois

This new facility for ADM Milling includes the flour mill, grain storage, and midds silos.

The flour mill is capable of bulk flour truck and rail loadout, bagging, and bulk midds truck and rail loadout. Younglove self-performed the design, management, and construction of the mill tower, including the cleaning house, process floors, finish product storage, truck load-out, and buildings.

The grain storage facility consists of separate new rail and truck receiving buildings with high-speed receiving systems, cleaning house, and transfer bridge. Younglove self-performed the design, management, and construction of twenty 35-foot-diameter silos as well as the installation of material handling equipment.

The midds silos structure consists of two silos with a truck loadout bay underneath the silos, a transfer bridge to rail loadout, and a transfer bridge from the mill. Younglove self-performed the design, management, and construction of two 35-foot-diameter silos as well as the installation of material handling equipment.
