Completion Time

9 months

Younglove's Services

- Structural engineering
- General construction
- Construction management
- Slipform concrete construction
- Equipment installation

Neosho, Missouri

This facility receives raw ingredients in bags, boxes, tote bags, pneumatic trucks, and hoppers trucks.

The vitamins, minerals, and carriers are blended together by an automated batching system and transported to one of the two packaging lines. Finished product is bagged or placed in tote bags for shipment.

A warehouse for incoming material and finished product storage and an office were also constructed.
