

FRITO-LAY CORN HANDLING FACILITY

Owner

Frito-Lay, Inc.

Size/Capacity

2,200,000 bushels

Completion Time

12 months

Younglove's Services

- General construction
- Slipform concrete construction

Sidney, Illinois

Nearly 12,000 cubic yards of concrete were placed utilizing Younglove's slipform process to erect four separate bin clusters in just five weeks. An area ready-mix supplier erected an on-site batch plant to improve the speed and efficiency of delivery to help reduce transportation costs.

The concrete work for the project was handled in merit-shop fashion, combining union and non-union workers, in order to effectively meet a very demanding schedule at a very competitive cost.
