- General construction
- Construction management
- Slipform concrete construction
- Equipment installation

Waco, Georgia

Except for a small number of enhancements, this feed mill in Waco, Georgia, is similar to the plant we built in Tuscumbia, Alabama, five years previously.

Ingredients are received by rail and truck at up to 400 tons per hour. Included are a 60-ton-per-hour grinding system, an 8-ton batching system, and two pellet lines with downstream fat coating.

The grain annex includes cone hoppers for 13,775 tons of corn. Mill storage includes 2,550 tons of ingredients, 250 tons of mash, and 2,100 tons of finished product.
